# Windows Server and Networking Engineer

Attuaris – The leader in financial modeling hosting is looking for an experienced Windows Server Support Engineer to join our experienced support team which currently support the existing Clients and hosting infrastructure. The ideal candidate would have significant experience in the installation and configuration of Microsoft Windows server platform and configuring IP networks.

**The ideal candidate would be:**
- Client Focused
- Ability to interact with demanding Customers in global insurance organizations
- Methodical and practical in approach
- Diligent about documentation standards
- Show initiative and the ability to work on your own
- Have a broad range of technical skills and the ability to apply these skills
- Reliable and dependable

**The specific technical skills required are:**
- Setting up Windows Domains
- Establishing Domain Trusts
- Installing and configuring Windows 2003 and 2008 servers
- Configuring Server Hardware
- Configuring secure network equipment

The opportunity also requires Windows HPC experience, however for the right candidate, training will be provided.
